/Randy Gulakowski/ Supervisory Patent Examiner, Art Unit 1796			

Continuation of 11. does NOT place the application in condition for allowance because: The examiner maintains the position set forth in the Final Office Action. Applicants have argued the presence of unexpected results due to the use of a branched polyamide layer in a multilayer structure. In response, attention is directed to the Response to Arguments Section of the Final Office Action mailed on 9/10/2007. Furthermore, applicants have not explained how a 2 kN/m difference in the Elmendorf tear strength is indicia of unexpected results.

In response to applicant's argument that Bayer does not disclose a blow molded multilayer film having high strength, the fact that applicant has recognized another advantage which would flow naturally from following the suggestion of the prior art cannot be the basis for patentability when the differences would otherwise be obvious. See Ex parte Obiaya, 227 USPQ 58, 60 (Bd. Pat. App. & Inter. 1985).

In response to applicant's argument that Johnston is nonanalogous art, it has been held that a prior art reference must either be in the field of applicant's endeavor or, if not, then be reasonably pertinent to the particular problem with which the applicant was concerned, in order to be relied upon as a basis for rejection of the claimed invention. See In re Oetiker, 977 F.2d 1443, 24 USPQ2d 1443 (Fed. Cir. 1992). In this case, Johnston and Bayer are considered analogous art since they both deal with multilayer films comprising a polyolefin and polyamide layers. It is not necessary that the references solve the same problem of the herein applicants.

It is noted that Bayer disclosed polyethylene as a suitable polyolefin (thus polyethylene usable in blow molding), thus there is a reasonable expectation LLDPE is suitable for use in blow molding. Furthermore, Johnston discloses that polypropylene can be blow molded, this, there is a reasonable expectation that utilizing polypropylene in the combination taught by Bayer and Johnston would have been successful.
